Software Developer and Cybersecurity graduate with 7+ years of experience developing enterprise banking applications and customer-facing financial systems.

Experienced in secure software development, web applications, backend systems, and database technologies using C#, .NET, Java, Python, C++, and SQL platforms. MSc in Computer Science for Cybersecurity from Oxford Brookes University and CompTIA Security+ certified.

Seeking opportunities in cybersecurity, SOC operations, application security, or secure software engineering.

WORK EXPERIENCE

Freelance work

2023 - Current

Freelance Software Development & Security Consulting

- Static Analysis Security Testing (SAST) of a user identity system written in Python, identifying weaknesses (credentials/secrets left in code, code that gets wiped when optimized) and delivering a remediation report.
- Python, Bash and PowerShell scripting work for various small clients for automation, file management and data scraping.
- Playtesting a game for an indie game developer, identifying bugs and delivering a feedback report
- Updating C++ 17 code to C++ 20 for a software company, resolving compiler errors in a function that uses JSON data.

Bank AL Habib Limited

Jun 2015 - Sep 2022

IT Officer Grade I (Programmer/Software Developer)

Karachi, Pakistan

- Built and maintained internal banking applications handling sensitive data, working within a regulated banking environment subject to audit, access-control, and data-protection requirements.
- Developed digital banking and loan-processing systems supporting customer onboarding where secure handling of PII and financial data was a core requirement.
- Engineered and maintained a web banking application on Oracle SOA and Oracle Banking Digital Experience (OBDX), writing backend and database logic in C# (MVC.NET) and Java against IBM DB2, SQL Server, and MySQL, with attention to secure coding practices (input validation, access control, safe query handling) given the platform's exposure to customer transactions.
- Participated in interviewing and onboarding technical hires, contributing to team technical assessment.

EDUCATION

Oxford Brookes University

Sep 2022 - Dec 2023

MSc Computer Science for Cybersecurity

Oxford, UK

Modules: Malware analysis, Secure programming, Operating Systems Security, Enterprise Networking, Secure Systems Architecture.

Thesis: "RSA- Really Staying Alive" Research project analyzing RSA implementation, security considerations, and comparison with Elliptic Curve Cryptography.

National University of Singapore

Jul 2010 - Jun 2014

BEng Electrical Engineering

Singapore

Modules: Power electronics, Electric Drives and Control, Physics for Electrical Engineers, Signals and Systems, Programming Methodology, Programming for Computer Interfaces, Data Structures and Algorithms, Engineering Professionalism.

Thesis: "Optical meta-surface to display a 3-D image in air" investigating the optical properties of 'metasurfaces' and how they alter the path of rays of light.

COURSES AND CERTIFICATIONS

CompTIA

Sep 2025

SY0-701 - CompTIA Security+ certification exam

- A certification that showcases professionals' capabilities in securing networks, applications, and devices, ensuring data integrity, confidentiality, and availability.

Udemy

May 2019

Machine Learning A-Z™: Hands-on Python & R in Data Science

- Covered Dimensionality Reduction, Reinforcement Learning, and Deep Learning,
